WHO ARE WE?

Zero Energy is a Melbourne-based renewable energy retailer helping Aussie households switch to smarter, cleaner, all-electric living.

We offer solar panels, batteries, energy-efficient aircon & heaters, heat pumps, and EV chargers—all under one roof. We support programs like Solar Victoria and the VEU to maximise rebates and cut upfront costs for our customers.

Our team tailors solutions to reduce bills, boost comfort, and future-proof your home. From gas-to-electric upgrades to smart home builds, Zero Energy is your partner in the journey to net-zero living.

Step by step, toward a Zero Carbon Future.

ABOUT US

OUR CORE VALUES

- 1 Safety is our number one priority
- 2 We act with integrity and honesty
- 3 Customer before the bottom line
- 4 We take pride in our work
- 5 We are one company, one team

Planting A Tree For **Every** Customer...

Yarra Yarra Biodiversity Corridor,
Western Australia

**United
Nations**

Contributing to **7** of United Nations' Goals.

Zero Energy is proud to partner with Carbon Neutral through the Plant-A-Tree Program.

For every customer who chooses Zero Energy, a native tree is planted in Western Australia's Yarra Yarra Biodiversity Corridor—contributing directly to **seven** of the United Nations Sustainable Development Goals.

Become a part of the change. Take your next step with Zero Energy.

CEO's Message

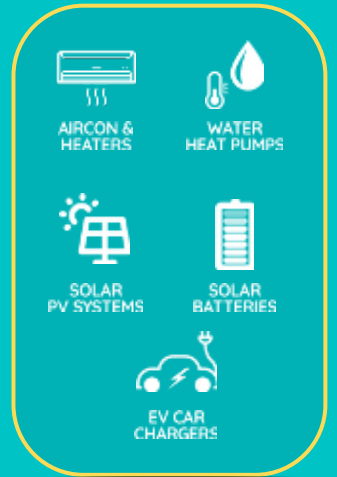

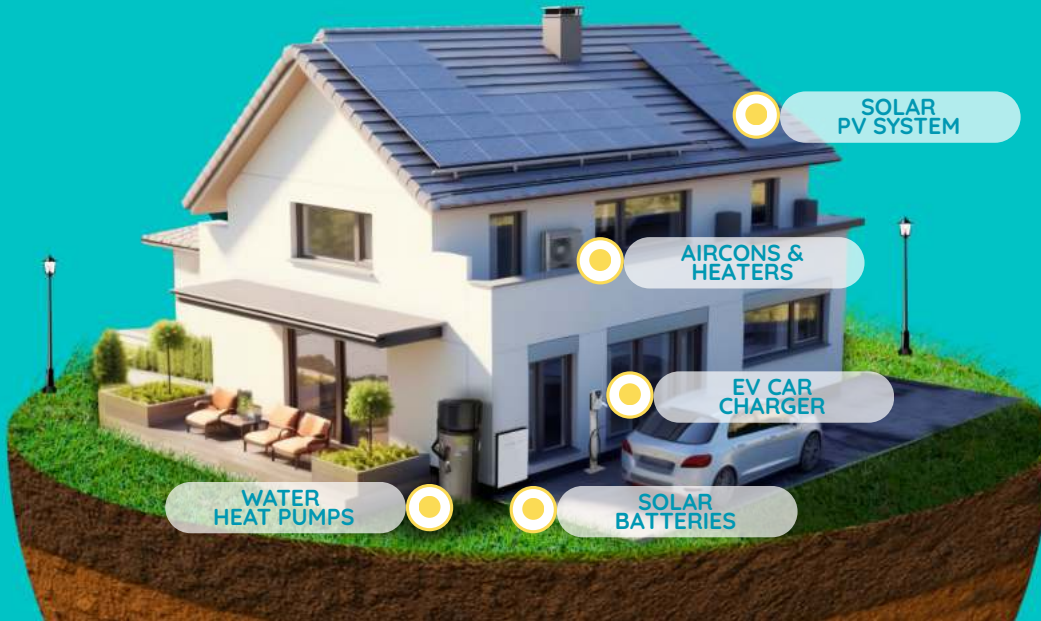

At Zero Energy Australia, we are dedicated to transforming the energy landscape by providing sustainable solutions to households and businesses. Our mission is to empower our customers to embrace renewable energy and achieve energy efficiency while making a positive impact on the environment. We specialise in offering a wide range of renewable products and services, including solar PV systems, batteries, aircon & heaters, heat pumps, and EV chargers.

Help us help you take the next Step.

Savy Narang
CEO

Step by Step, towards a
Zero Carbon Future

Why Zero Energy?

Zero Energy's Gas to Electric program helps households switch to energy-efficient electric systems—like Aircon & Heaters, hot water Heat Pumps etc—cutting gas bills, lowering emissions, and unlocking government rebates for smarter, greener living.

One Stop Shop

One partner, one solution! Zero Energy handles it all, so you know exactly who to call for support.

Reduce Carbon Emissions

Switching to electric means fewer emissions, good for the planet, great for your peace of mind.

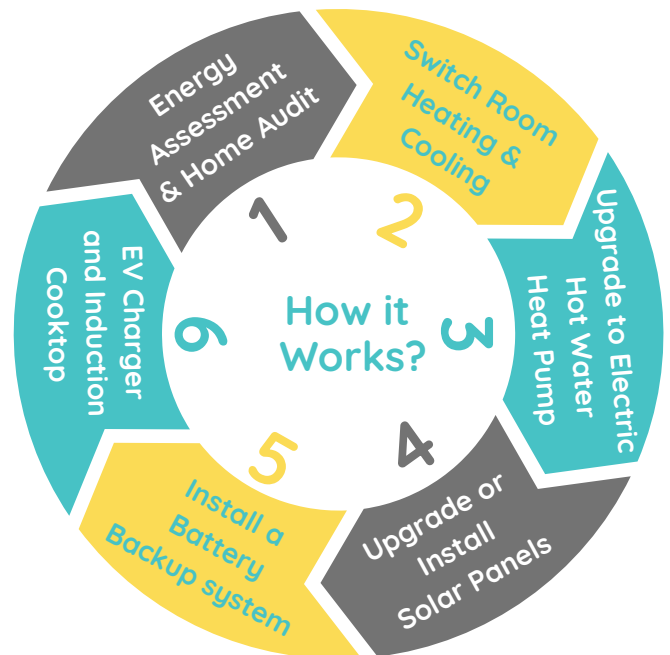

Cost Effective

Maximise rebates, slash bills, clean energy doesn't have to cost more.

REVIEWS

”

Savy's proactive approach and attention to detail really set Zero Energy apart. I felt well-supported throughout the project

Suresh Kumar

”

I had an excellent experience with Zero Energy's installation of a Carrier 16.2kw ducted system. We appreciate Ayon's wise counsel and the easy process. We would especially want to thank Sandeep for their excellent installation...

Eddie Ezel

”

Well done to the installation team and thanks to Sachin for getting me in touch with them. Extremely happy with the product and the service.

Rohan Chaudhary

”

Management, you should have more "Sales managers" like Steve Kourtis. The reason why I selected Steve was he has this attitude "NO BULL" persona with me. Upfront and honest. ...

billy.jean111

”

Extremely pleased. Work performed was very professional and contact with supervisor has been professional and easy to deal with. Spilt systems are awesome and cool my home easily. Highly recommended. Thank you thank..
